Summary

I am a developer with 7 years of experience, including over 4 years as a Technical Lead. I am skilled in leading teams, training developers, and improving development processes. I have worked with technologies like WordPress, PHP, and .NET CMS platforms. I always learn and apply new technologies, recently using ChatGPT to save 40% of my work time.

Technical Skills

- **Front-End:**

- HTML5, CSS3, JavaScript, JQuery
- ReactJS, React Native
- Tailwind CSS, GSAP, CSS Animations
- Elementor, Gutenberg, ACF

- **Back-End:**

- PHP (WordPress, Joomla)
- .NET (Kentico, Sitecore)
- Swift, Objective-C (iOS Development)
- Headless CMS

- **Dev-Ops:**

- Amazon AWS
- CI/CD Automation, Jenkins
- Webpack
- Git Workflow

- **Other Skills:**

- Group Lead and Training
- Web Scraping

- Performance Optimization (Lighthouse)
- AR Development (8thWall, AR Web Apps)
- HubSpot, MojoFlex
- OneTrust Cookie Management
- Quick Learner
- Excellent Debugging and Problem-Solving
- Application of Best Practices
- Strong Research Skills
- Communication

Education

Bachelor of Science in Information Technology

Telecommunications University (Signal Officers Training College)

Graduated: July 2017

Experience

Gravity Global

Technical Lead

Jan 2022 – Jun 2024

- Built a sprint team of 11 members
 - Trained and improved dev skills
 - Trained and improved tester skills, got an ISTQB Certificate
 - Created code starter and automated the CI/CD process
(e.g., *push code -> run automated tests -> deploy to staging/prod*)
- Reviewed the design, created a blueprint, monitored development time for improvement, created a launch plan, launched the website, and ensured everything is ready for going live
- Supported the PM on the tech stack
- Worked on React Native, Elementor, WP Gutenberg, WP ACF, HubSpot
- Maintained the website and provided technical support for the whole development team
- Named Employee of the Month for July 2023. [Link to announcement](#)

Projects: Faith Radio Network

Role: Technical Lead/Developer

Responsibilities: Integrated CarPlay into the project within a 4-week timeline, which included learning React Native and Objective-C.

Tech Stack: React Native, Objective-C, CarPlay

Project URL: [iOS](#) | [Android](#)

Projects: Animation Projects

Role: Technical Lead

Responsibilities: Reviewed the design and helped developers avoid getting stuck on tasks. Created a demo for client review and as a reference for the development team.

Tech Stack: Tailwind CSS, GSAP, CSS Animations

Three latest projects:

- [WTO 2023 Annual Review](#)
- [Ringer](#): Created a '3D Phone Animation with CSS' demo for client review and as a reference for the development team
- [WTO 2022 Annual Review](#)

Projects: Elementor Projects

Role: Technical Lead

Responsibilities: Reviewed the design, created a blueprint, monitored development time for improvement, created a launch plan, launched the website, and supported the PM.

Tech Stack: Drupal, Elementor, SiteGround, Web Scraping

Three latest projects:

- [NewQuest](#): Developed the 'Find a Property' module, spending a lot of time on it.
- [Syndeo](#): Converted from the Drupal site and created tools for importing over 1,000 articles
- [Involta](#): Converted from the Kentico site and created tools for importing articles

Projects: WordPress Projects

Role: Technical Lead

Responsibilities: Reviewed the design, created a blueprint, monitored development time for improvement, created a launch plan, launched the website, and supported the PM.

Tech Stack: WordPress, Gutenberg, ACF, SiteGround, Web Scraping

Three latest projects:

- [COX Enterprises](#): Converted from the Kentico site and created tools for importing articles
- [Band-IT](#): Converted from the Kentico site and created tools for importing articles
- [VinoTastr](#): Handled some tasks due to the tight timeline

Projects: HubSpot Projects

Role: Technical Lead

Responsibilities: Trained the team to use HubSpot and MojoFlex for development

Tech Stack: HubSpot, MojoFlex

Three latest projects:

- [Perry Homes](#)
- [STACK Infrastructure](#)

Projects: Maintenance Projects

Role: Technical Lead

Responsibilities: Fixed urgent security bugs and kept the CMS up to date

Tech Stack: Kentico, WordPress

Three latest projects:

- Kentico: <https://www.radiowaves.com/>
- Kentico: <https://www.strtrade.com/>
- WordPress: <https://rapidscale.net/>

Group Lead

Jul 2021 - Dec 2021

- Led and managed a team of 8 members
- Worked on 8thWall, Craft CMS
- Attempted to build a 4-member team to handle the work of 8 members but was unsuccessful

Projects: Bell Flight AR

Role: Group Lead

Responsibilities: Developed the AR website using 8thWall

Tech Stack: 8thWall, AR Web App, JavaScript

Project URL: Bell Textron internal project

Projects: Steam Solutions

Role: Group Lead

Responsibilities: Monitored progress and reported status to upper management

Tech Stack: Craft CMS

Project URL: <https://www.steamsolutions.com/>

Technical Lead

Jan 2020 - Jun 2021

- Worked with Amazon AWS
- Improved website performance
- Worked on ReactJS, Headless CMS, AR app, OneTrust
- Built tools for website tracking, analysis, and automated testing

Projects: Site Envision AR

Role: Developer

Responsibilities: Created code structure and developed AR views using Swift

Tech Stack: Swift, Xcode

Project URL: <https://apps.apple.com/vn/app/site-envision-ar/id1573815682>

Projects: actzero.ai

Role: Technical Lead

Responsibilities: Improved headless CMS site scored 80 for performance on PageSpeed Lighthouse

Tech Stack: ReactJS, Headless CMS, Lighthouse performance

Project URL: <https://apps.apple.com/vn/app/site-envision-ar/id1573815682>

Projects: STACK Infrastructure

Role: Technical Lead

Responsibilities: Improved Lighthouse performance to over 80 on mobile and implemented the OneTrust cookie management

Tech Stack: WordPress, ACF, Lighthouse performance, OneTrust

Project URL: <https://www.stackinfra.com/>

Back End Developer

Jan 2019 - Dec 2019

- Worked on PHP CMS projects like Wordpress and Joomla
- Worked on .NET CMS projects like Kentico and Sitecore

Projects: Band-IT

Role: Back End Developer

Description: Developed with Kentico CMS; this was my first project in this role.

Tech Stack: Kentico

Project URL: <https://www.band-it-idex.com/>

Frontend Developer

Jan 2018 - Dec 2018

- Proficient in Git Workflow, Responsive Design, and Cross-browser Compatibility
- Proficient in HTML5, CSS3, JS, and JQuery
- Built front-end starter framework using Webpack

Projects: AGI

Role: Frontend Developer

Description: This was my first project in this role.

Tech Stack: HTML5, CSS3, JS, JQuery

Project URL: <https://www.agi.net/>

BizzOn

Developer

Jul 2017 - Dec 2017

- Developed IoT applications using Arduino and Raspberry Pi

Certifications

- Giải Ba - Olympic Tin học Sinh viên Việt Nam 2015

Issued: Jan 2015
